San Francisco Bay

Port of Redwood City
Notice of Preparation
Port of Redwood City Wharves 1 and 2 Redevelopment Project

Date: April 29, 2009

To: Public Agencies and Interested Parties

From: Michael J. Giari, Executive Director, Port of Redwood City

Subject: Notice of Preparation of a Draft Environmental Impact Report for the Port of Redwood City Wharves 1 and 2 Redevelopment Project

The Port of Redwood City (“Port”) is proposing to implement a number of improvement projects intended to renovate and upgrade some of the presently dilapidated wharf facilities as well as to realign some of the site’s current operations in order to increase the Port’s future throughput potential. The need for the proposed project stems from the steady growth in cargo throughput that the Port has experienced over the last 10 years as well as from the poor current physical condition of the existing structures on the project site. Collectively, the projects proposed as part of this redevelopment are referred to as the “Wharves 1 and 2 Redevelopment Project.”

The project description, location, and probable environmental effects of the proposed project are described in the attached materials. The Port of Redwood City is soliciting comments regarding the scope and content of the environmental information, which are germane to your agency’s statutory responsibilities in connection with the proposed project. Your agency may need to use the EIR when considering permitting or other approvals. Because of time limits mandated by State law, your response must be sent at the earliest possible date but not later than 30 days after receipt of this notice.

Please provide your written response to the address shown below by **5 p.m. May 29, 2009**. We will need the name of a contact person in your agency.
